Data Scientist

Project Title	Data Scientist
Project Summary	Support the Transparency Division of ODNI's Civil Liberties, Privacy and Transparency Office as you analyze data to help create reports, info-graphics, presentations and other projects with data science techniques.
Country	United States

Project Description

Develop metrics, graphs, spreadsheets and other projects using data science skills. Task will include evaluating existing data, and processing new data to create interesting print, electronic and web-based products that will help the transparency team illustrate their key points.
